

IAN MUNGWADZI

Mechanical Engineering undergraduate seeking a Year in Industry placement to apply problem-solving, simulation, and data analysis skills to innovative, high-impact engineering projects, whilst developing professional soft skills.

EDUCATION

Northumbria University, Newcastle-Upon-Tyne, UK 2023-Present
BEng in Mechanical Engineering 2021-2023
1st Year Modules: Statics and Dynamics, Applied Engineering Approaches, Thermodynamics

Queen Elizabeth Sixth Form College, Darlington, UK
A-Levels in Chemistry, Physics and Computer Science
Awards: Industrial Cadet - Gold Level, Team Awarded Most Innovative Project by EDT

WORK EXPERIENCE

Papaya Turn One, Company Director 2021-2025

Co-founder and Director of small motorsport media company and racing team (in progress)

- Currently working towards the creation of the UK's first student racing team

LM Wind Power, Design Engineer Intern, Remote 2021-2022

- Remote internship with LM Windpower and GE Renewable Energy during Industrial Cadets
- Interpreted stress simulations to recommend design and material changes to improve product lifecycle

RAP Riders Academy, Pit Crew + Race Engineer 2024

- Working with rider Hudson Kai Cooper during Teesside legs of the FIM MiniGP and FreeTech Endurance Junior Talent Cup
- Analysed rider telemetry (GPS traces, throttle/brake application, lap times, and sector splits) to identify performance trends and optimise race strategy.
- Adjusted suspension, gearing, and tyre setup based on live performance data and rider feedback, improving competitiveness across multiple races.

LEADERSHIP EXPERIENCE

President of QE Radio and QE Motorsport, Queen Elizabeth Sixth Form College 2021-2023

- Producing and promoting podcasts within the college, created content for the social media pages (now deprecated).
- The role of President of QEM lead to the creation of Papaya Turn One, a sports media company I co-founded with another QE Radio member.

Student Representative, Queen Elizabeth Sixth Form College 2021-2023

- Coordinated open evening events for prospective students, created example projects for prospective students to get a taste of collegiate level Computer Science and Physics lessons

Team Principal, Northumbria University Formula Student

- Leading a multidisciplinary team in the design, build, and testing of the university's debut Formula Student car, overseeing engineering, sponsorship, and operational deliverables
- Securing partnerships and sponsorships with industry stakeholders

SKILLS AND INTERESTS

- *Technical Skills:* C#, Python, MATLAB, ABAQUS, Solidworks, Fusion 360, Data Analysis
- *Qualifications:* Motorsport UK Race Marshal, Industrial Cadet Gold, Student Member – IMechE
- *Sports:* Newcastle Blackhawks (Flag American Football, 3 years)
- *Interests:* Motorsport, Biomedical Engineering, Sustainable Technologies, American Football
